PROFILE

Motivated Infocomm and Security student with hands-on experience in software development and network design. An enthusiastic and proactive team player with a strong interest in computer and network security. Skilled in networking, programming, and application development,

EDUCATION

Diploma in Infocomm and Security | Nanyang Polytechnic (NYP)

Apr 2024 - Present

- Assistant Class Representative Y2 S1; Class Representative Y2 S2
- NYP InfoSec SIG Subcommittee
- *Director's List* Y1 S2 AY24/25, Y2 S1 AY25/26
- Competed in CTFs: DSTA CDDC 2025, NUS GreyCTF 2025, NYP InfoSec June CTF 2025 (Top 15)

EXPERIENCE

Nanyang Polytechnic

June 2025 - Present

NYP InfoSec SIG | Subcommittee Member

- Promoted club activities and enhanced student engagement through initiatives
- Challenge author and technical support for the bi-annual CTFs

United Overseas Bank

March 2026 - Present

Infrastructure Analyst Intern

- GIPS - SR - Infra - VM/Cloud/Windows
- Develop dashboards using React.js and Django
- Design and maintain monitoring dashboards to visualise system health, capacity, and performance KPI
- Enhance existing dashboards for better visibility and usability
- Automate repetitive monitoring tasks using Python
- Work with stakeholders to understand dashboard requirements

PROJECTS

Data Analysis & Visualisation Assignment

December 2024 - February 2025

- Developed an interactive Tableau dashboard for Quantum Vault Bank using cleaned and merged datasets to analyse customer profiles, auto-loan performance, and overall banking insights.
- Performed structured data analysis and applied modelling techniques to uncover meaningful trends supporting strategic decision-making.
- Collaborated with team members to design clear, well-organised visualisations and demonstrate understanding of business lines through dashboard interactions.
- Presented individual contributions and recommendations to support the bank's five-year strategic direction.

Systems Security Project

April 2025 - August 2025
April 2025 - August 2025

- The objective of this project is for students to apply the knowledge and skills acquired to demonstrate insecure and secure web applications/APIs/Systems, and develop secure web applications
- Implemented Multi-Factor Authentication with Email, Phone OTP and Face ID
- Built an interactive logs admin dashboard with charts, filters, heatmaps, and AI-generated summaries to visualise system activity and enhance threat detection.
- Developed an RBAC system enforcing least-privilege access with Admin, Manager, User, and Guest roles, allowing easier user management.
- Developed an IP Management module with traffic monitoring, IP blacklisting, and auto-expiring blocks, integrated with logs and heatmaps to detect anomalies and mitigate brute-force/DoS attempts.

CERTIFICATIONS

Google Data Analytics Professional Certificate

August 2024

Google Cybersecurity Professional Certificate

August 2024

Micro-Certification - Welcome to ServiceNow

September 2025

ServiceNow Certified System Administrator (CSA)

Plans to take during after semester 2 ends (After February 26 2025)

EC - Council Certified Ethical Hacker

Plans to take during after semester 2 ends (After February 26 2025)

SKILLS

Soft Skills: Adaptability, Teamwork, Self-Directed, Good Work Ethic, Receptive to feedback

Languages: English, Chinese

System Administration: Windows, Windows Server, Linux

Network: LAN/WAN, TCP/IP, Routing, Subnetting, VLANs

Web Development: HTML, CSS, JavaScript, Python Flask

Programming Languages: Python, JavaScript

Database Management: Tableau, SQL, SQL Alchemy
